

GR commitment to HSE

Excellence in health, safety and environmental performance is a core value for GR Energy Services, and it is the responsibility of every member of the GR team. We are committed to operate in a safe and responsible manner and to protect our people, contractors and customers along with the environment while providing cost-effective, quality services to our customers. We aim to be a recognized leader in our industry for HSE performance in the eyes of our employees, contractors, customers and the public.

GR pathway to career success

Your GR career begins with a 24-month training program to develop the hands-on safety, teamwork and technical skills required to become a General Operator. During this program, individuals who demonstrate a high commitment and dedication to excellence can be awarded the opportunity to enter the field supervisor program, which develops the management skills required to become a GR front-line manager leading a field crew during wellsite operations. After advancing through the field supervisor program, selected individuals are offered the opportunity to move into sales, technical or operations management positions. This fixed-step program builds experience, character and leadership skills—skills that can be used to achieve career as well as personal goals.

Grow with GR

At GR Energy Services, our goal is to help our customers safely deliver a more profitable well. Our management, technical support, HSE and field crew teams are completely focused on delivering measurably better field performance. To reach that goal, we hire recent graduates and industry veterans who work together to fuel our clients' success. We invite you to grow your career at GR Energy Services.

Who we hire

Our dedication to excellence in health, safety and environment and our capacity to provide superior service to our customers are the keys to meeting the challenges and opportunities that abound in the oilfield industry. And our commitment to success starts with the way we recruit, train and develop our teams.

We offer our employees numerous opportunities to use their varied skills, and GR purposefully cultivates a dynamic environment that promotes career development.

A rapidly growing company, GR Energy Services employs only the best candidates for each job and location. Among the skills we look for are

- Technical and hands-on competence
- Ability to work as part of a team
- Appropriate response in stressful situations
- High aptitude for solving problems
- Attention to detail
- Capacity to handle extreme outdoor conditions
- Receptiveness to change

GR Energy Services employees are given the chance to work on challenging and rewarding projects at locations across the United States. From the start, top management gives you the opportunity to apply the skills you learn in our interactive training courses and then supports your efforts to make meaningful contributions to our team. Our success rests on sharing knowledge, gaining new competencies and finding ways to solve challenges.

Training from day one forward

The knowledge you have gained by attending a university or in your previous endeavors will empower your future, and at GR Energy Services, high-quality training is again fundamental to your success and the success of our business. Our ability to adapt to new business challenges is strongly linked to the ability of our teams to become proficient in a variety of skills.

The GR training program includes classroom- and digital-based learning, and hands-on interactive jobsite training designed to prepare you for the start of your career. As an oilfield trainee, you are exposed to a curriculum that blends technical, safety, personal development, business/managerial and on-the-job skills—all with the purpose of guiding you toward the important role you will play at GR Energy Services.
