

PHIRE AWAY Frac Plug

OVERVIEW

The PHIRE AWAY Frac Plug is an ultrashort dissolvable frac plug that provides reliable zonal isolation during hydraulic fracturing. A compact all-metal design puts less material in the well, while the ductile metal sealing technology eliminates leak paths. Geometric sections are optimized for predictable dissolution, eliminating mill times.

PRODUCT HIGHLIGHTS

- ✓ Full metal seal to ensure no leaks
- ✓ Large bore and short length reduces material
- ✓ Interlocking slip design to resist backflow
- ✓ Predictive Dissolution in both fresh and saltwater

FEATURES

10,000 PSI
Differential Pressure Rating

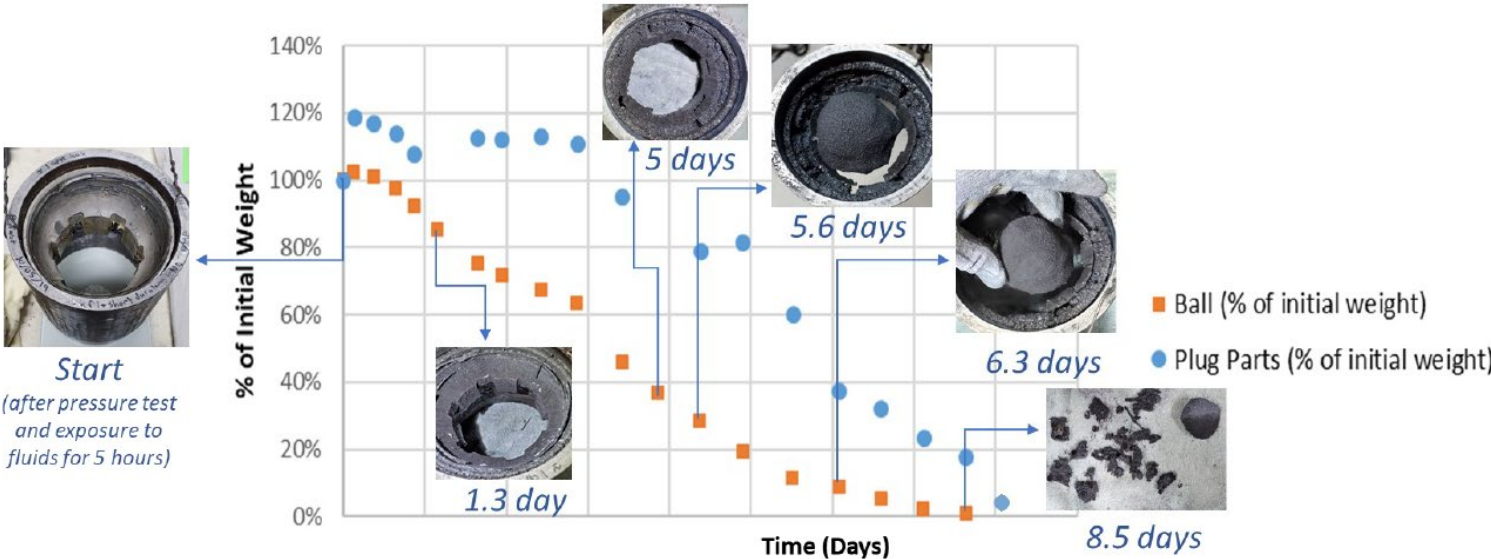

350 Degrees F
Temperature Rating

99.4%
Dissolvable Material

3.5" Set Length
